Composite PRESSES

Excellence , Design , Performance

WWW.ITALMATIC.EU

Italmatic company realizes the designing, the manufacturing, the installation and the commissioning of the hydraulic presses on the strength of the technical and managerial experience gained over more than 40 years through several fields of application. The mission is achieved using high quality of materials and components combined with advanced technology that exceed industry standards.

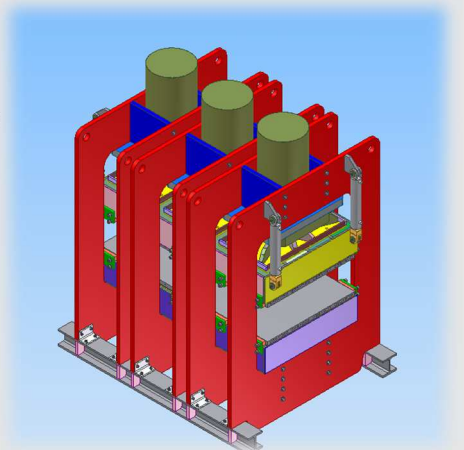

Standard or on demand press design.
Single or Multiple plates presses designed according the required working pressure.
Heating and or cooling system may be provided on each or single plate as well as the auxiliary system.

Provided with hydraulic components of reliable quality to allow fast approach and modulating closing pressure

Calculation based on CAD and FEM analysis for the design of the structure according to the final use

The management of all process parameters is ensured by an in house dedicated SCADA management and supervision software, which provides full traceability and repeatability of the production processes

ITALMATIC PRESSE STAMPI S.R.L.

Ufficio/Office: Via Villa Pompea, 31-20060 Cassina De' Pecchi (Milano)
